

## Six Prestigious Awards for Curvelle's New Catamaran Superyacht **QUARANTA** - enthusiastic reception from design and yachting arenas.

Released London 27 August 2014

With "Best Concept Yacht under 50m" awarded in 2011 (during construction) and five more awards in 2013- 2014 since launching, the 34m (110 ft) catamaran motor yacht "quaranta" has been the proud winner of six prestigious awards . "We are extremely satisfied and grateful for this enthusiastic endorsement from the superyacht owners, builders, and design arenas. The smart thinking and innovation that went into the design of "quaranta" has been very well received" says van Zanten, the founder of Curvelle.

Years of experience in yacht consulting and construction convinced him that a fresh way of thinking was needed to deliver an efficient, cost effective, flexible and more accessible yacht while still maintaining beautiful exterior lines, luxurious and spacious interiors. Believing that the catamaran platform offers the key to achieving this, he put together a talented team of designers, naval architects and marine engineers from various continents to produce range of superyacht catamarans with a clear design focus without re-inventing the wheel, but with attention on producing a very attractive superyacht catamaran. The result speaks for itself and is clearly endorsed by the numerous awards that quaranta has won.

This innovative catamaran impressed judges with her many unusual features such as flexible cabin layout, allowing multiple cabin configurations, all guest cabins on the main deck with extra-large windows, stern platform for tender launching, swim/beach platform, reduced mobility access and carbon fibre composite construction. Judges also complimented the exterior styling, spacious deck and interior guest areas and the construction quality.
